

KLOVE radio is broadcast on a low power translator in our area near Sacramento. KLOVE serves our family as a positive, Christ centered ministry to allow us to listen to christian based music without interruptions. Listening to this station helps us focus each day our holy God and live to help others and spread the word of our Lord through music. If you listen to the "garbage" playing on other FM stations in our area, stuff that can really influence young people's lives, you would understand why KLOVE is so important.

If KLOVE were to be displaced by a LPFM broadcaster, the community where we live would lose big time; the loss of positive music with real meaning and music to live your life by. It would be hard to live without it.

I believe the public is interested in keeping KLOVE available and on the area in areas that use translators. This allows the signal to reach people in more areas at minimal cost. As KLOVE is totally listener funded (e.g. the just ended fall pledge drive allowed all stations to be fully funded for next 6 months), the support is clearly evident that the public is interested in having this station available, either through higher watt stations in larger metro areas or low power translators in smaller areas. This is IMPORTANT!!
